Professional  
Data Analysts

**Thank you to the North Dakota  
Department of Health  
Tobacco Prevention and  
Control Program**

**March 2020....**

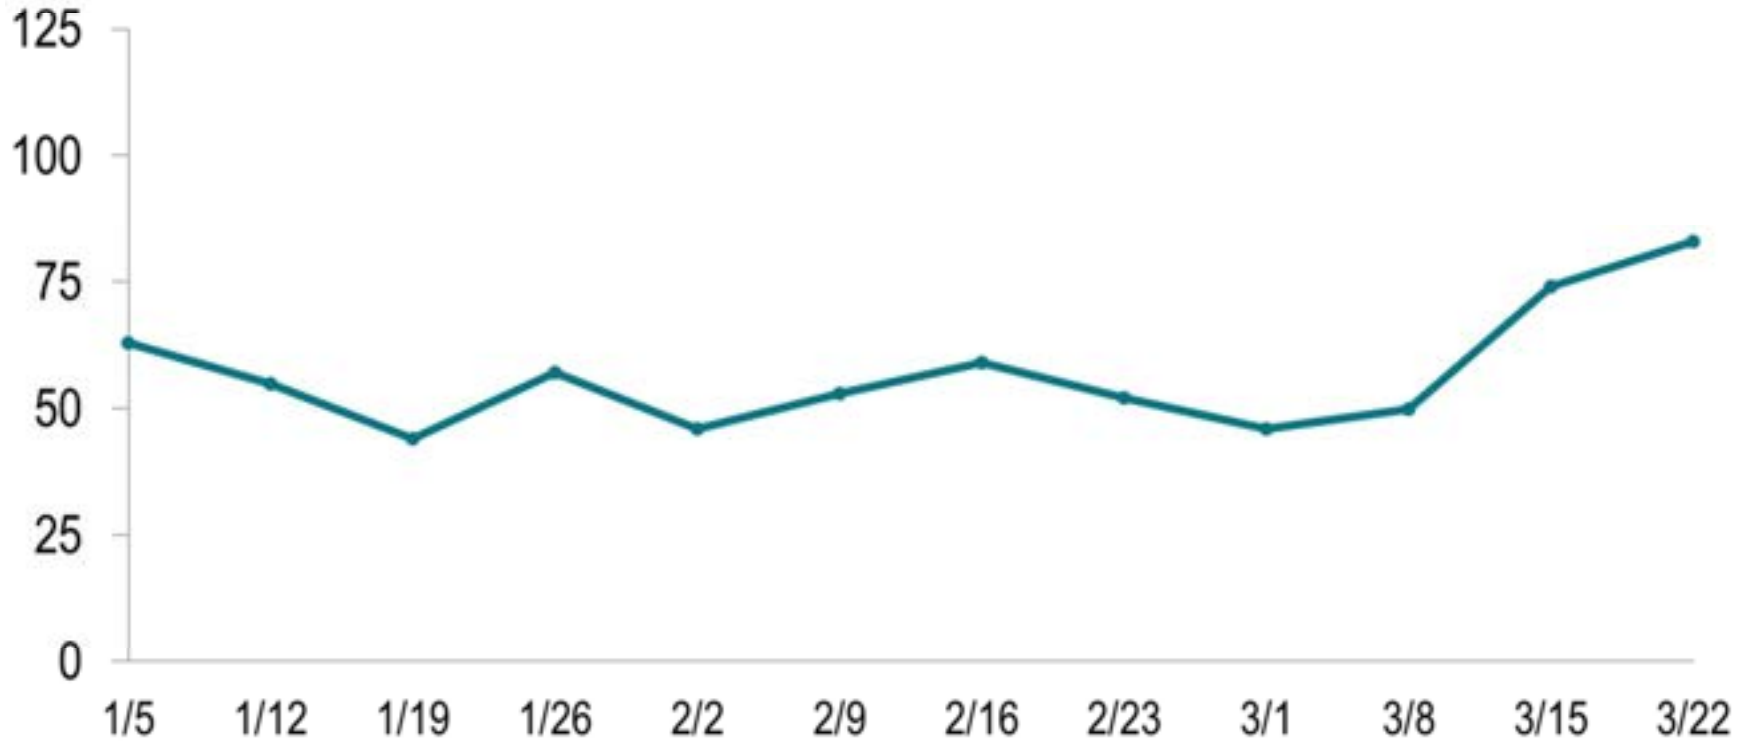

**How is COVID-19 going to impact the Quitline?**

Incoming calls  
to the Quitline  
jumped from  
50 to 74!

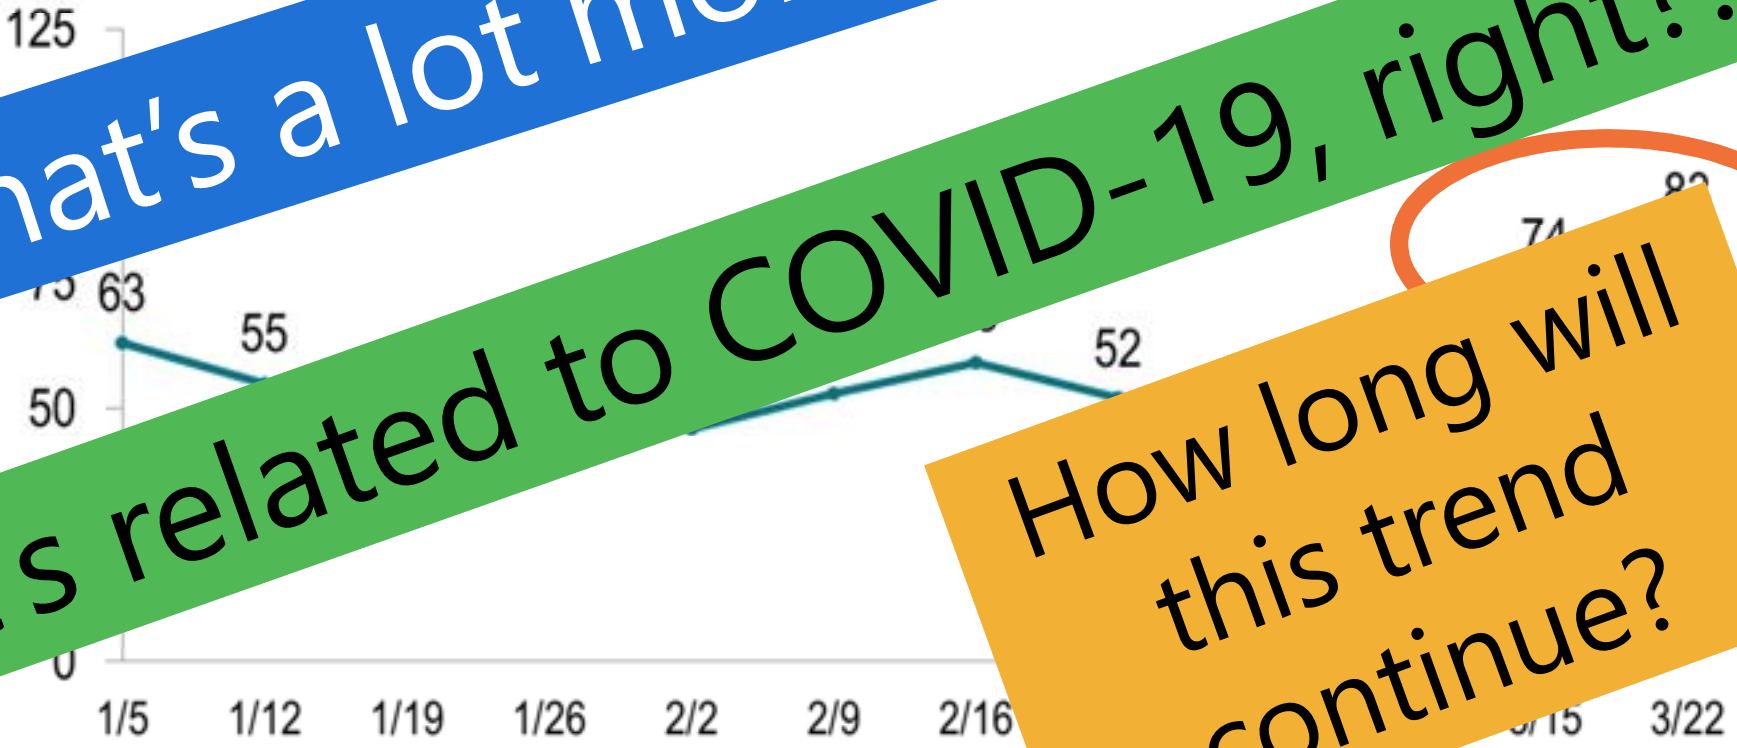

# Number of incoming calls per week to NDQuits

## Number of incoming calls per week to NDQuits

Number of incoming calls to NDQuits

That's a lot more!

It's related to COVID-19, right?!

How long will this trend continue?

# Statistical Process Control (SPC)

# Commute Process

# High-level

Define the  
steps in your  
process

Identify a  
meaningful  
metric

# High-level

Define the  
steps in your  
process

Identify a  
meaningful  
metric

Understand  
the **variation**  
in that metric

**Random**

**Special cause**

# We want to...

- measure the **extent of the variation**,
- establish to **what degree the variation matters**,
- and **to whom** it matters.

# What is a control chart?

## Control Chart for Percentages

**Metric**

**Time**

# Title

## Control Chart for Percentages

## Control Chart for Percentages

## Control Chart for Percentages

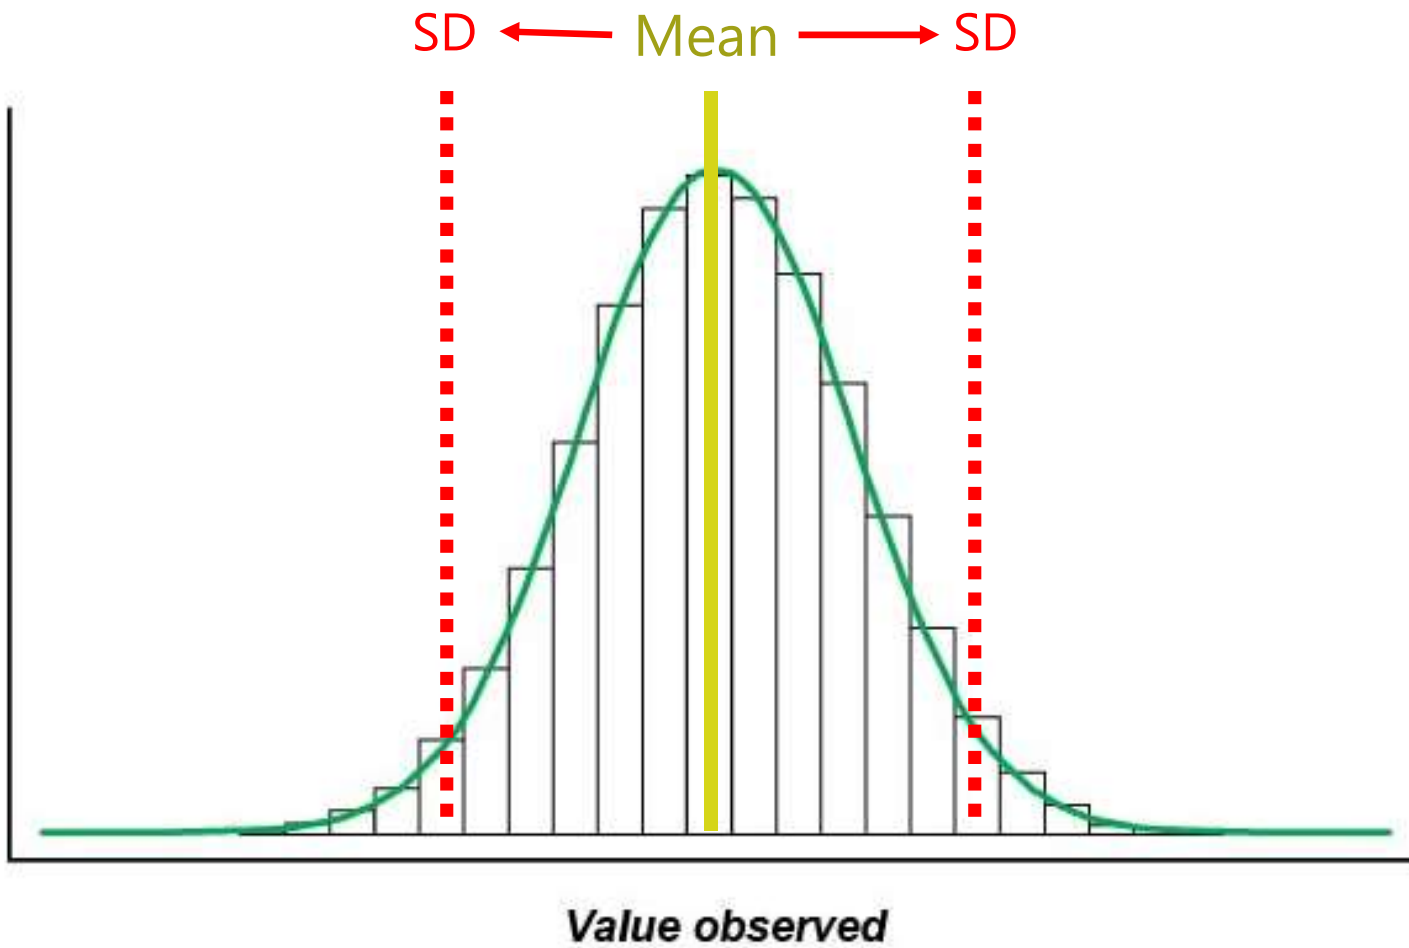

## Control Chart for Percentages

# Control limits....

Mean  $\pm$  3 standard deviations

**Number of times observed**  
(Number, rate, percentage, proportion)

# Control limits....

Mean  $\pm$  3 standard deviations

# Control limits....

... help distinguish  
**random variation** from  
**special cause variation**

# Control limits....

- ... give an acceptable range for a metric
- ... provide action/decision thresholds
- ... are calculated from the data

## Number of incoming calls per week to NDQuits

# Number of incoming calls per week to NDQuits

**What do I do  
with it?**

# Assess {and monitor} the process

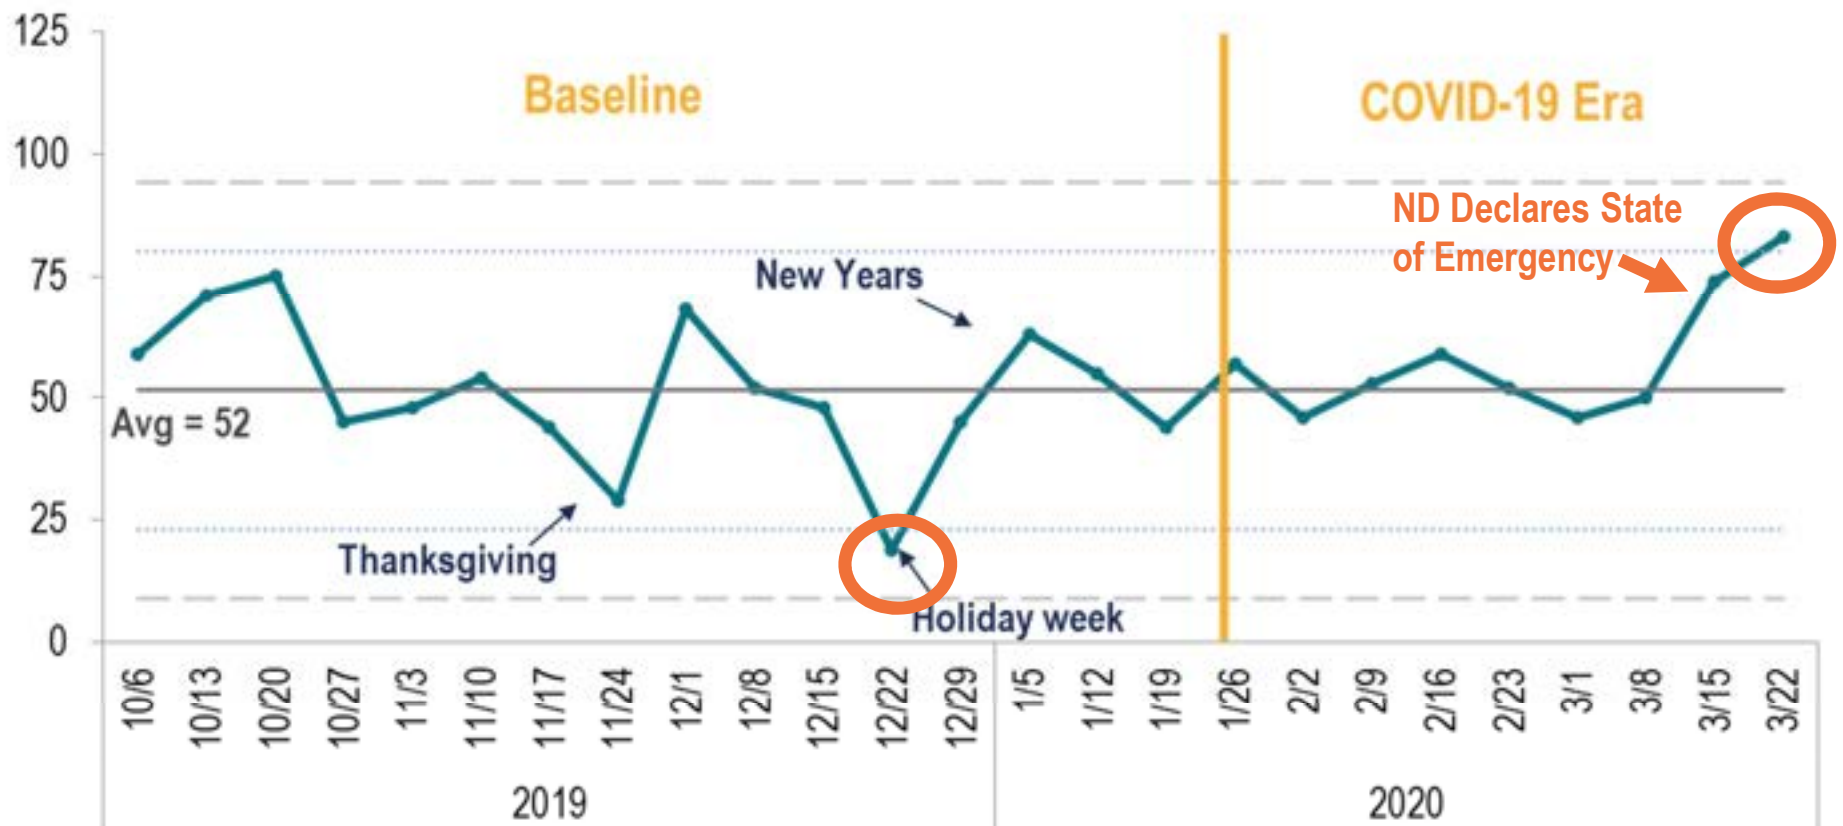

# Assess {and monitor} the process

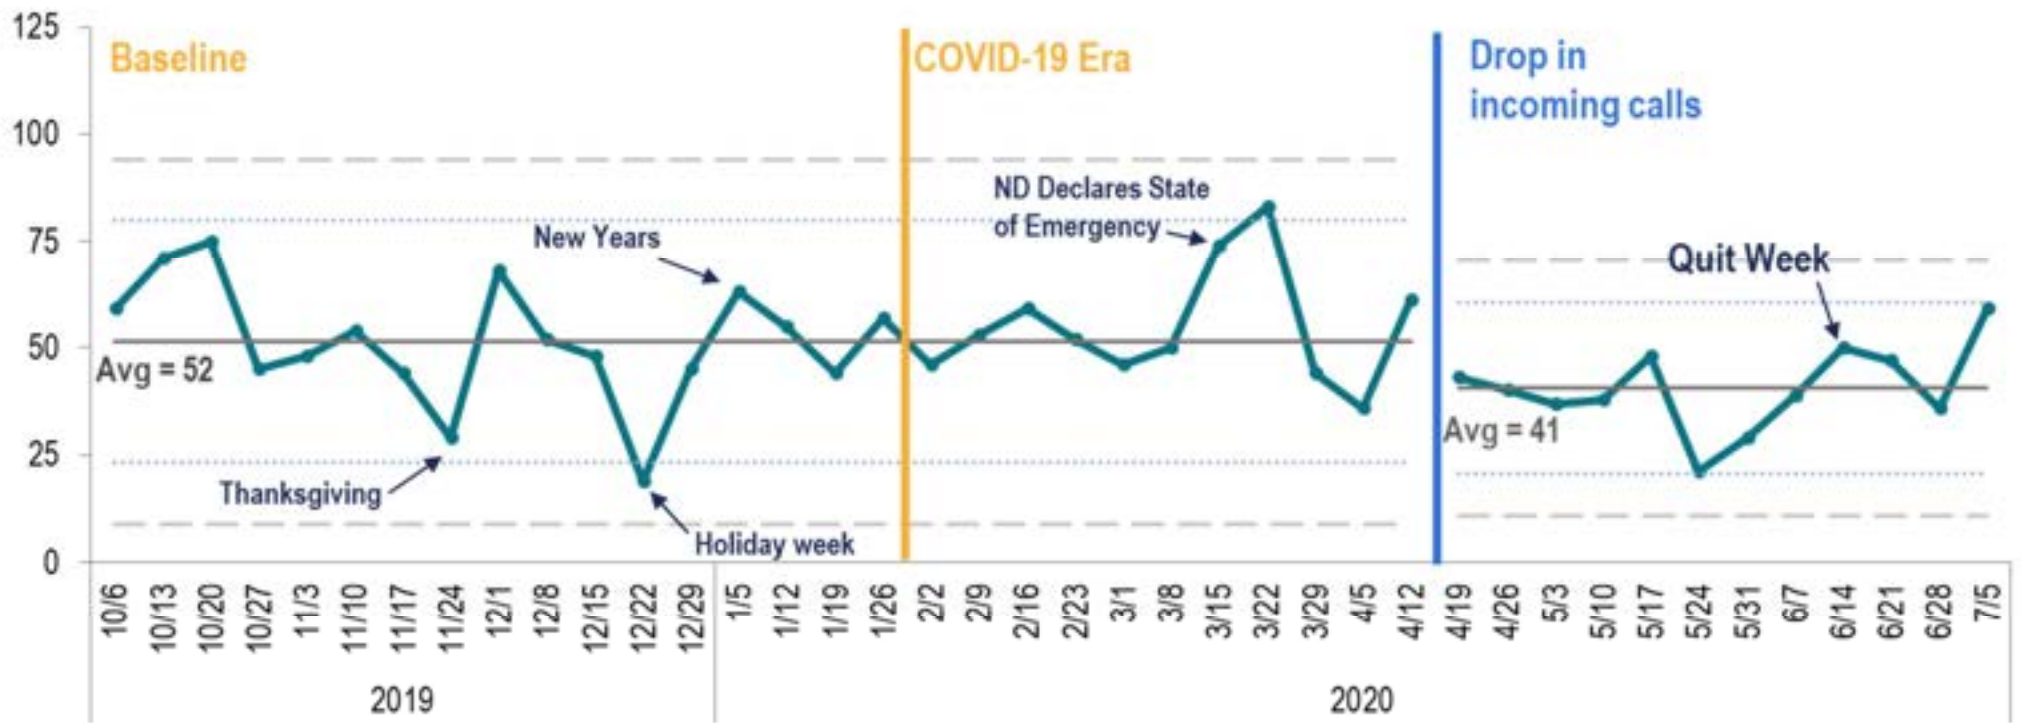

# Identify outliers/special cause

# Identify trends

# Identify trends

**Other metrics  
showed similar  
patterns**

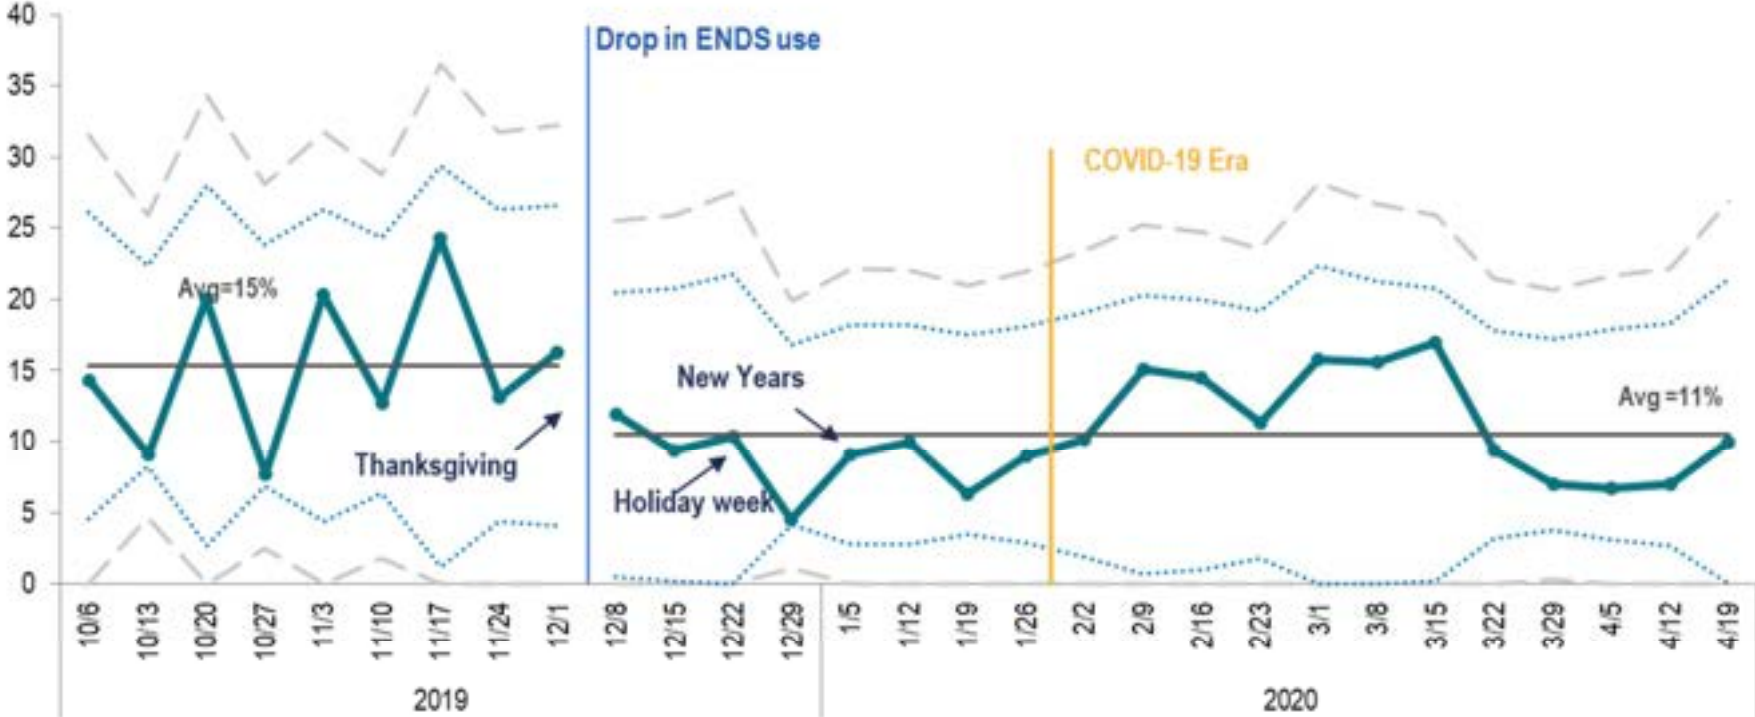

# Number of phone intakes completed per week for NDQuits

## Number of web intakes completed per week for NDQuits

Past-30-day ENDS use on web and phone intake forms by week (%)

## **Control charts are a great tool for:**

- Assessing and monitoring a process**
- Identifying outliers (distinguishing random variation from special cause variation)**
- Identifying trends**

Thank you!
